

FINANCIAL SERVICES NOW ONLY A MOUSE CLICK AWAY !

“ Delight your customer with the comfort they seek ”

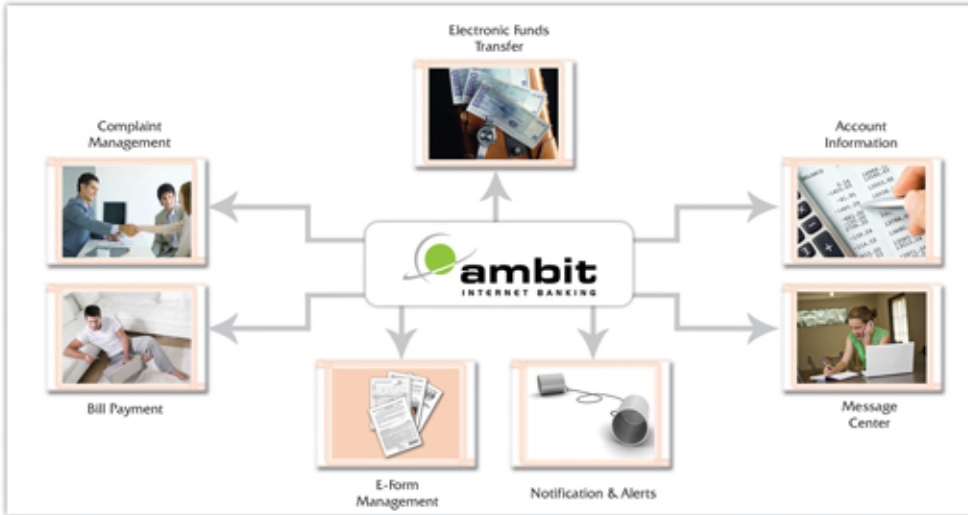

**Ambit** is a strategic Internet Banking product that ensures continuous delivery of retail and corporate banking services to the bank's customers in a manner that is personalized, cost effective, efficient and most importantly secure. Unlike other products Avanza's Internet Banking requires no software to be pre - loaded at the customer site and is a true 'thin client' browser based solution.

In today's competitive environment where customers demand convenience and ease of access, retaining customers on the basis of conventional banking is not possible. Attracting and retaining customers requires us to provide banking and related services on demand and where and when the customer needs them.

With banking on the go, customers can now stay connected with a confident and safe feeling - a trust guaranteed by Avanza's Ambit. The prime advantage of our solution is that it is not bundled with any specific security package; its architecture is open for any security software package to be plugged in.

Some security models supported by Ambit are:

- PKI based software (like Secured Socket Layer)
- Digital Certificates (issued by VeriSign, Thawte etc)
- Digital Signatures

Some of the features of Ambit are:

- Complete view of Customer Relationships
- View and initiate Bank's product-related Queries and Requests
- Offline Transactions through eForms
- Online Transactions including Funds Transfer
- Batch Funds Transfer
- Individual/Batch Facility of Bill Payments
- Alternate Banking Channels Registration
- Provision to Edit Customer's Profile
- Alerts and Notifications
- Personalization
- Complaint Management

## OUR EXPERIENCE

Ambit requires no software to be preloaded at the customer site and is a true "thin client" browser based solution. It has been designed and developed to be completely independent of hardware, software database products and browsers. For provision of online services, the application will integrate with Bank's existing back-end application.

Avanza Solutions has a proven track record in providing solutions and services to the financial industry in the area of electronic banking. With a suite of products and solutions deployed at over 200 customers worldwide Avanza has gradually built its expertise in the alternate delivery channel domain. We have deployed systems in complex environments and have certified our products with international networks thus giving us the edge over the rest.

Our years of experience reflect in the sound and stable product framework, rich functionality and user friendly application interface. Ambit has been deployed in 3 leading banks in Pakistan and one in UAE. This on the go solution Ambit is a cost effective and reliable solution for the financial industry today. It is a complete solution that provides a one-stop online banking services. With Avanza's Ambit, banks' customers can conveniently and, most importantly, securely carry out their transactions with the bank from within their comfort zone of either home or office or wherever they might be.
